Smart Glass Door Lock: JD-669

Operation manual

Safety and Precautions

Electronic door lock as the high-tech products, the installation directly impact on the normal operation of the door lock and life, it is recommended that you have completed the renovation of the room before the installation of the door, please select the quality of personnel to install, and in strict accordance with the the company's installation standards to operating.

Do not use in environments with corrosive substances such as intense radiation, high magnetic field, high temperature high salinity, etc., to prevent the performance and life of electronic locks.

Please initialize the door lock when the door lock is completed, and restore the lock to the initialization state. Please set your electronic key immediately after initialization to prevent others from illegally opening your door lock.

To protect your safety, please check the key whether the key box opened or not.

Please keep your own set of electronic keys and mechanical keys.

Please also replace the same brand of 4 *1.5V over based batteries, old and new batteries or use non-alkaline batteries will damage your door lock.

In order to better feel convenient and advanced products of our company, please read the instructions carefully before use, if you have any doubt, you can directly call the headquarters of the company or customer center around the service center, the company has professional and technical personnel for your service, make sure you use the rest assured.

If you need to know more about our company or if your instructions are lost, you can log in to our website for inquiries and download.

Please collect our company's website in your computer so that you can always check my company's service information and product description.

Product feature

1.Open the door way: fingerprint, password, combination of other ways to make you feel safe and convenient.

2. Double authentication: with fingerprint encryption and dual-fingerprint combination of

open the door for your furniture to provide a double security security.

3.Leading algorithm: adopting international leading fingerprint algorithm, mature and stable.

4.Touch keyboard: with capacitive touch key and LED back light, beautiful and durable, comfortable operation.

5. Induction Power: fingerprint sensor should be powered, use will more convenient.

6.Display: humanized menu design, easy to operate.

7.Low voltage warning: the display screen shows the battery voltage in real time, prompting

the user to change the battery in time.

Lock body(Schematic of lock)

Smart Glass Door Lock Dimension Figure

Product features

(1)outdoor unlock

1. Enter the correct user (fingerprint. Password. Card) or the correct remote control key on the outdoor lock body, and the lock will automatically return to unlock.

(2) Outdoor lock

1. When the lock is in the auto-locked state, the door lock is aligned with the keyhole, the latch isautomatically closed.

2. When the lock is in the state of manual lock, after the door lock and keyhole alignment, touch any key to start the keyboard, press the "*" key holds out the lock .

(3) Indoor unlockRotate the knob, lock back, unlock.

(4) Indoor lock

1. When the lock is in the auto-locked state, the door lock is aligned with the keyhole, the latch is automatically closed.

2. When the lock is in the state of manual lock, the door latch is aligned with the keyhole, rotary knob ,the latch holds out the lock.

Matters need attention

1. Please do not let water, drink and other liquid ingredients infiltrate into the product.

2.Do not use acid material to clean the door. Please update your password regularly.

3.Please pay attention to the battery usage and replace the battery in time.

4.Do not use sharp objects to scrape and beat the door lock.

5.Try not to expose the door lock to outdoor, avoid sun exposure and rain erosion.

Technology and parameter details

| Working voltage | 4pcs*1.5V "AA" alkaline batteries | High quality |
|--|---|---|
| Fingerprint sesor type | Optical sensor | |
| Password keyboard | Capacitive touch keyboard | |
| Number of keys | 12 button (0~9, ensure, cancel) | Including managing passwords, fingerprints and |
